

Pavana NR

Mobile Application Developer

 Bengaluru, India paavana.n.r@gmail.com

Profile

Hi, I am a programmer, specializing in the mobile app development arena. For the last 3 years, I have been developing mobile application using Google's Flutter & Ionic framework.

I'm currently employed as mobile application developer at Techinfo Solutions Pvt, Ltd. I'm hands on in all stages of the developing & programming cycle, from planning and design to testing and deployment. No two days are the same for me; my tasks may involve analyzing algorithms, altering code, fixing bugs, brainstorming ideas or integrating new systems.

Something that I love about programming is the opportunity to work with people from a wide range of disciplines. The software development life-cycle involves working with so many different people and departments and, as a people person and someone who loves to build new relationships, it's great to be able to come together with other professionals who are striving towards the same goal.

Some of the application I have developed during the last 2 years include:

- ThinkZone – A teacher coaching application, which has been downloaded over 100 times.
- Vidyut – An IoT application to control home appliances & electronic gadgets.
- HelloRemotely – A job portal application which is made for job seekers/recruiters.

Employment History

Aug 2019 — Present

Bengaluru

Mobile Application Developer at TechInfo Solutions Pvt, Ltd.

1+ years experience in Dart language, developed 2 native applications using Google's Flutter Framework.
